

Modul Implementierungsforschung			
		Inhalte	
<b>Modulstatus</b>	Pflichtmodul	<b>Implementierungsforschung (1 ECTS)</b>	<b>Abschlussarbeit (4 ECTS)</b>
<b>Credits</b>	1 + 4 =5 ECTS	<b>Modulbeschreibung:</b> Despite of existing evidence about their cost-effectiveness, the sustainable integration of many key health interventions, including rehabilitation interventions, into health systems remains challenging. One potential reason for this is that traditional research methods do not equip scientists and key stakeholders to successfully implement interventions in clinical practice and policy. The objectives of this course to introduce the CAS participants to methods used in implementation research and to equip them for a successful preparation of their final CAS project.	Vertiefung in ein spezifisches Thema in einer der angebotenen Sprachen, mit Supervision einer der Professoren. Keine Kernkompetenzen werden erarbeitet, aber Umfang der Forschungsarbeit definiert. Über Forschungsgegenstand in einer der Kliniken.
<b>Sprache</b>	E, D, F, I		
<b>Veranstaltungsort</b>	Vorort und UniLU		
<b>Art des Moduls</b>	Praxis und Forschung		
<b>Modulverantwortliche</b>	Carla Sabariego/Diana Pacheco		
<b>Dozierende</b>	Externe	<b>Zu erwerbende Kompetenzen:</b> Theoretical and practical knowledge of methods used in implementation research	
		<b>Lerninhalte:</b> The course will introduce CAS participants to the need of moving beyond traditional research methods and approaches, and focuses on methods used internationally and in Switzerland in implementation research. The course will also introduce CAS participants to current efforts of the World Health Organization (WHO) to foster implementation research.	
<b>Leistungsnachweis</b>	Abschlussarbeit	<b>Lehr- &amp; Lernformate:</b> <b>Kontaktstunden:</b> 16h (2 Tage) und <b>Selbststudium:</b> 14h  Problem-oriented learning (POL) and lectures.	<b>Selbststudium: 120h</b> eigene Forschungsarbeit  Selbständige Forschungsarbeit
<b>Optional</b>	Wahlmodul	Wissenschaftliches Schreiben
