

## Course Enrolment in the MSc Health Sciences (via moodle)

Deadline Course enrolment/unenrolment: From semester start – two weeks after respective course start.

- ➔ *If you wish to acquire ECTS and have the course listed on your transcript of records, please do not forget to also register via Uniportal (binding). For more information please see: <https://www.unilu.ch/en/study/courses-exams-regulations/health-sciences-and-medicine/exams/>*

You can register via the respective course link on the [online course catalogue](#) or directly in the [course overview](#) on the [E-Learning-Platform Moodle](#).

### 1 Course enrolment

- a) Enrolment via link in the [online course catalogue](#): under «Registration».

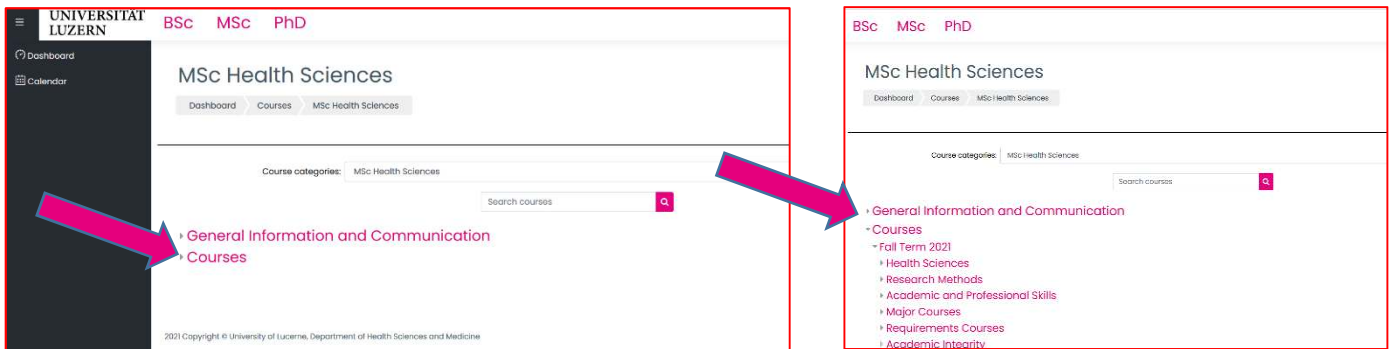

Disciplinary Perspectives of the Health Sciences		<a href="#">add to watch list</a>
Lecturer	Prof. S. Rubinelli; Prof. G. Michel; Prof. S. Boes; Prof. Dr. med. Gerold Stucki; Prof. Dr. rer. pol. Andreas Balthasar	
Type of course	Lecture	
Code	HS211016	
Semester	Fall semester 2021	
Department	Health Sciences	
Study level	Master	
Date/s	We, 13.10.2021, 12:30 - 14:00, 3.B58 We, 20.10.2021, 12:30 - 14:00, 3.B58 We, 27.10.2021, 12:30 - 14:00, 3.B58 We, 03.11.2021, 12:30 - 14:00, 3.B58 We, 10.11.2021, 12:30 - 14:00, 3.B58 We, 17.11.2021, 12:30 - 14:00, 3.B58 We, 24.11.2021, 12:30 - 14:00, 3.B58 We, 01.12.2021, 12:30 - 14:00, ZOOM We, 15.12.2021, 12:30 - 14:00, ZOOM Mo, 17.01.2022, 10:30 - 12:00 (Examination)	
Further dates	The course is a mandatory Basic Course (1st semester).	
Course content	The course presents different disciplinary perspectives of the health sciences, including health communication, health behavior, health economics, and health policy. Different lecturers will introduce their scientific fields, allowing students to develop a broad and critical understanding of the various approaches. The application of knowledge to real-world problems is an integral part of the learning experience. Students will also be informed about the major choice, the internships, and study opportunities after the first semester.	
E-learning	Slides, tutorials, scientific articles. All teaching material is provided via the e-learning platform moodle.	
Learning objectives	At the end of this course students should be able to (i) demonstrate a basic understanding of the different perspectives of the health sciences, ii) recognize the importance of interdisciplinary approaches to study health, functioning, and well-being, and iii) apply scientific reasoning to the analysis of current events and case readings related to health and healthcare.	
Prerequisites	Grade 4.0 or better	
Language	English	
Limitation	Restricted to Health Sciences students	
Registration	<a href="https://elearning.hsm-unilu.ch/course/view.php?id=436">https://elearning.hsm-unilu.ch/course/view.php?id=436</a>	
Exam	Final written examination	
Type of exam	final written examination 3 Cr	
Notes	Teaching method(s): Blended learning with lectures, tutorials and online activities	
Guest students	No
