LUMACSS Launch Conference

Computational Social Sciences and Digital Skills at the
University of Lucerne

11. NOVEMBER 2019, 09:00–17:00H, HS 10

LUMACSS – Computational Social Sciences and Digital Skills at the University of Lucerne

Digitalization has changed the world and will change it again in the near future. Higher education institutions must therefore train students to seize the new opportunities and to avoid the pitfalls of a hyper-dynamic job market. Inspired by this vision, the University of Lucerne is taking up this challenge by strongly expanding its training offer in digital skills.

Also, we initiated LUMACSS – the Lucerne Master in Computational Social Sciences –, an interdisciplinary master's programme designed to equip its graduates with the knowledge and skills needed to tackle the main social challenges of the digital age.

It is our pleasure to announce this LUMACSS launch conference – an event open to all students, researchers, faculty and the interested public. The conference will encompass five panels, two input reflections and three main sections: 1) debates in the scientific community on Computational Social Sciences and digitalization, 2) challenges faced by – and opportunities offered to - practitioners in the digital age, and 3) the perspective of the state.

We are proud to welcome a wide range of international experts from academia, the private sector and the public sector at the University of Lucerne for this launch conference and we are looking forward to their contributions.

Prof. Dr. Alexander H. Trechsel
Prof. Dr. Sophie Mützel
PD Dr. Mira Burri
Dr. Andrea De Angelis
