

«Projektmanagement für early career academics mit Schwerpunkt auf dem Kommunikationsaspekt»

Kursleitung	Daniel Angerhausen, ETH Zürich
Organisation	Graduate Academy
Sprache	Deutsch
ECTS-Punkte	2
Anzahl Pers.	max. 16
Inhalt	<p>Every time scientists communicate within or outside their communities, in group meetings, at conferences, in proposals or with policy makers, communication skills are key. Multidisciplinary and multicultural teams in academia pose a particularly diverse environment and very special challenges for team and project communications. Effective and purposeful communication is a critical component for success not only in academic projects.</p> <p>In interactive exercises and games participants will be provided with the necessary tools for successful science and project communication.</p> <p>Learning Objectives</p> <ul style="list-style-type: none"> • Basic communication strategies for scientists • Introduction to the basics of project management from a communications angle • Introduction to the fundamentals of communication with various stakeholders • Strategies to manage and monitor your project communications • Methods to communicate in diverse groups with different interests and backgrounds <p>You wish to improve clarity and effectiveness of your project communication. You will be able to benefit from this course regardless of your field of research or the language required for scientific communication in your field.</p>
Vorbereitung	One week in advance of the workshop, participants will be asked to fill in a worksheet
