

Working Student Corporate Procurement

Switzerland, Lucerne

The Swiss Steel Group is a globally leading producer of specialty steel long products, tool steel and alloyed and high-alloyed engineering steel. For 175 years, we have been focusing on shaping the future and driving innovations that change the steel industry. With our Swiss Green Steel products, the Swiss Steel Group will stand for climate-neutral steel in the long term.

With us, people can make a difference. We offer many opportunities to help shape the company, meet the needs of our customers, and develop as part of an international team.

Are you interested to join our team of Corporate Functions in shaping the steel industry of tomorrow? We look forward to hearing from you!

Your assignment

- Support Corporate Procurement in creating insights, spend data and market intelligence reports
- Maintain Procurement analytics tools and create professional reports, dashboards, and presentations
- Help to build effective ESG in Supply Chain- and CO2 emission reduction-programs, and interact with internal stakeholders and external suppliers
- Prepare and follow up on cost improvement workshops and business process improvement project
- Take active role in project management for procurement suite/ IT solution implementation
- Support in improving Master Data Cleansing for Vendors, Material Groups and Material master data

Your background

- Studying Business Administration, Supply Chain Management, Procurement, Finance, IT, Data Science or Engineering
- Professional knowledge of Microsoft Office; possibly business intelligence tools
- First experiences in business analytics and project management, preferably in an international environment or management consulting,
- Strong analytical and conceptual skills; efficient, proactive and creative working methodology; able to manage multiple projects
- Team player with great communication skills
- Fluent in German and English, oral & written. French is a plus

Our offer

- Be part of a spirited, dynamic team with international colleagues who look forward to meeting you
- Think for yourself, use all your skills, implement your fresh ideas and learn on the job
- Flat hierarchy, short decision making ways and close collaboration with stakeholders on all levels
- Opportunities to contribute to and learn in an industry in transition and support a sustainable future for all: our steel is 90% recycled material
- Workplace flexibility. The position can be offered at different locations, such as Lucerne or Germany
